These days, many of talented young artists have created new performances influenced by western culture. They are very creative.

[문제점] However, after I traveled to other countries and watched their performances, I realized that many of performances in Korea have adopted many aspects of western culture as part of their own.

[의견/느낌] It is not always bad but I guess we shouldn't lose our own. In addition, we should be proud of Korean arts and performances as a citizen of this country.
