3. Discussion questions:

1. What types of behaviour is terrible for a girlfriend or boyfriend to have?
   I think a terrible personality would be micromanaging, overly jealous and too needy. It shows that the person is not comfortable or confident with themselves that they have to stifle the person they're with.

2. What type of person makes a good husband or wife?
   Maybe a good type of wife for me would be compassionate, outdoorsy and funny.

3. Do you think opposites attract?
   I think that opposites do attract sometimes, like a nerdy person might be attracted to a more athletic person. But it seems like it might be hard for them to stay together.
