What I enjoy the most watching this program is the unskilful daddies. It might sound strange but it's fun to watch when they are so embarrassed and don't know what to do under unexpected situation. Also, the kids in the show are so cute. They are usually in the range from 5 months to 3 years, and, you know, it's so amazing how young babies learn how to talk, walk, and so on.

Part 2

And… why would I recommend this programme to others? Firstly, it's because it's very educational. In the show, it often explains what to do for certain aged children in certain kind of situation. It also refers some experts' advice as well, so I think it could be very useful to the preliminary parents. Secondly, it's quite informative. It was surprising to know that there are so many places that serve a variety of activities for kids. In some places, you can have your children try different types of jobs like a nurse, a model, a pilot etc., and in other places, your children can experience farming in the middle of the nature. So, it provides people with a lot of practical information. This is why I'd like to recommend this show to others, especially, to parents with young children.
