Let me tell you about one time I helped my best friend 승화.

- let me tell you about 명사: 명사에 대해 얘기할게

One day, she called me and asked if I could help her with her school work. Talking about her, she didn't go to university when she was young because she had to work at that time. Although she settled down earlier than others, she always wanted to get a university degree. So, she started studying Media 2 years ago, and it was the very first semester when she asked for help to me. Since she's got a job, she didn't have enough time for her assignment and when the deadline became closer, she felt desperate according to her. What she asked me to do was basically researching. To do the assignment, she had to find out some data such as the average time to watch TV for both genders, what channels they like to watch and why and so on and so forth. So, I helped her with this research part. Also, her typing was quite slow compared to me, so I helped her to type for some of her assignment. Eventually, she could meet the deadline and the result was quite satisfying giving her B+, which must have been impossible without my help.

How did I feel after? First, I felt very rewarded. She is my best friend who always volunteers to help me. And finally, I had a chance to help her, too. Even better, she got a pretty good grade, so it was really rewarding. At the same time, I was proud of myself, too. Although it was not something that required much of expertise, I could be a big help with my research and typing skills. That made me feel really proud of myself.
