1. Skill Practice 1

Some students like to take courses on-line.

Others prefer to study in traditional courses on campus.

Which do you prefer and why? Include details and example to support your explanation.

On-line course	Traditional Course
Possible anywhere Convenient Flexible Save time/energy	Interact w/ others X organized person X self-disciplined Class discussions/ presentation

Sample Answer 1

I think I'd have to say that I prefer to take online courses. The first reason is because it's very convenient. To be more specific, online courses provide easy access. If there's any computer device with an Internet connection, you can easily access your online lectures anywhere and anytime. Another reason is that it's also economical. For example, a few years ago, I had a chance to take some online courses. Back then, I had to work and study at the same time, so I thought taking online course would be pretty convenient. I realized that it was not only convenient, but also economical in terms of cheaper tuition fees and the time that I saved since I didn't physically have to go to school. So, for these reasons, I prefer to take online courses.

Sample Answer 2

Although I've never taken an on-line course before, I think I would rather take a regular course on campus. One reason is that I'm not a very organized or self-disciplined person. That's why I really need to have a class, so I will keep up with readings and assignments. Another reason is that I really like to interact with other people, like my professors and classmates, face-to-face. I would definitely miss out on that if I took an on-line class.
